

Worry-Free Data Security with TCC TxEIS Data Center Hosting

Natural or human-made disasters. Hardware failures. Computer viruses. Power outages. Network vulnerabilities and failures.

DISASTERS ARE EVERYWHERE.

That's why we have TCC TxEIS Data Center hosting. You can have complete peace of mind with our state-of-the-art Data Center comprised of Dell and Cisco equipment. Our fully redundant design has automated disaster recovery failover from our facilities at ESC-11 in White Settlement and ESC-20 in San Antonio. We're SSAE-16 SOC2 Type-1 certified and offer a comprehensive security solution with firewalls, security appliances, and switches. And you don't need to worry about hardware upgrades. Over 200 LEAs running 1000's of scheduled tasks a day are hosted with us. Become one of them!

Full TCC TxEIS Data Center hosting not only means your schools are running up-to-date software, it means your data is safe.

TCC TxEIS Data Center Hosting includes...

TxEIS & txSuite Applications

- Automatic updates and new releases
- Major releases installed by TCC staff
- A tested environment (testing occurs on the Data Center)
- The capability to run scheduled tasks multiple times a day
- Established relationships with 3rd-party vendors
- Quick and easy setup and deployment for new clients

Support

- Phone support (24 x 7) with immediate developer access if there is a major problem
- Alert/monitoring tools (24 x 7)
- Dedicated TxEIS and txSuite staff
- All hardware, software, and services
- Automatic updates of the operating system, network, and antivirus protection

Disaster Recovery

- Secure data storage with hourly database backups (never lose more than an hour of data)
- Remotely replicated data every 15 minutes
- All data saved to tape and stored off-site
- Mirrored sites
- Disaster recovery

Performance

- All flash storage
- Scalability, allowing more resources to be added as necessary
- A single directive, meaning all actions at the data center ensure the applications run at the highest performance possible

Reliability

- Protection from DDoS attacks using VeriSign (maximized resilience, enhanced operational efficiency, and increased availability)

Proven protection, performance, and support.
